

South China Advanced Laser Technology and Application Exhibition

November 16-18, 2022
Shenzhen World Exhibition & Convention Center
www.lasersouth.cn

Focus on New Infrastructure to Drive New Needs and Trigger New Scenarios

LEAP Expo Members

Shenzhen Action Plan

- Shenzhen has started "upgrading the intelligence level to develop an advanced manufacturing industry" through the promotion of intelligent, green and high-end manufacturing technologies.
- South China, with its strong economy and modern manufacturing technology, is an important base for China's automotive industry, ship building, electronic products, IT, household appliances and automation equipment manufacturing industries.
- In response to the huge demand for processing equipment in South China, the laser industry in this region has developed rapidly, and South China has in turn become a heavyweight market for the laser industry in China.
- The China Optical Society Laser Processing Committee (COS-LPC) and Messe Muenchen Shanghai Co., Ltd. jointly sponsored the LEAP Expo.
- With four exhibition areas-Advanced Light Source, Precision Manufacturing, Sheet Metal Processing and Processing Service, LEAP Expo demonstrates advanced laser manufacturing technology and equipment, as well as their latest applications and solutions in various industries in South China, including electronics, automotive industry, metals, moulds, ship building, and home appliance.
- The exhibition is a platform for the in-depth and comprehensive understanding of the laser processing technology, equipment and related technical issues.

Product Categories

- Advanced laser manufacturing
- Lasers and optoelectronics
- Processing control and supporting system
- Smart inspection and quality control technology
- Biotechnology and medical technology
- Laser processing services
- 3D Printing / Additive Manufacturing
- Innovative technology demonstration

Exhibition Sector: Smart Inspection in Smart Manufacturing

Laser enterprises are still facing many difficult points in testing process in smart manufacturing in 3C electronics, semiconductors, integrated circuits, new energy, medical and other application fields.

2022 Laser South China will prepare an exhibition sector to show "Smart Inspection in Smart Manufacturing", which will focus on presenting and communicating with the intelligent inspection solution and technologies in smart manufacturing.

2022 Registered Exhibitors

*Part of Exhibitors, in no particular order

Review of last LEAP Expo

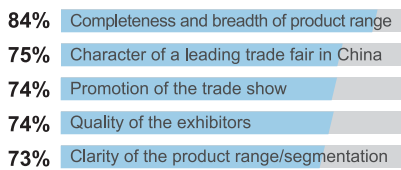

650+ exhibitors and brands

60,000 square meters of exhibition space

38,693 trade visitors

Assessment of LEAP Expo

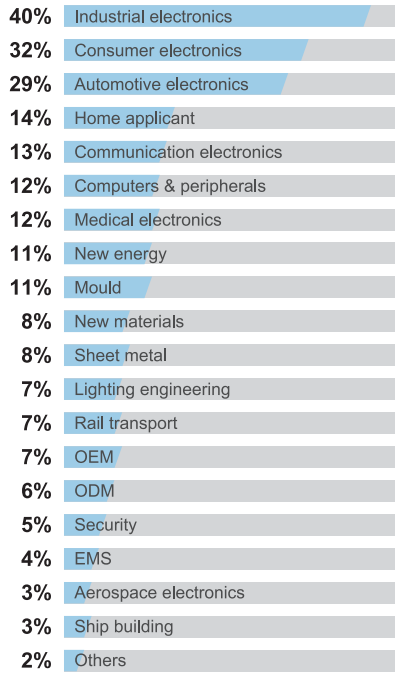

97% Visitors will visit the next LEAP Expo

96% Visitors will recommend LEAP Expo to business partners or colleagues

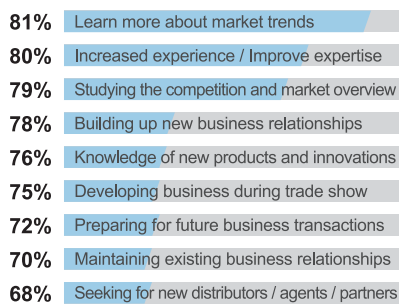

80% Visitors benefited from visiting LEAP Expo

*Data and feedback came from LEAP Expo 2020 visitor survey

Business Scope of Visiting Companies

Visitors' Objective

Supporting Program

About 30 events during the show. Focus on Laser "Smart" Manufacturing Technology and Development Trends

- Market Summit on Laser Processing Applications about Guangdong-Hong Kong-Macau Greater Bay Area
- Workshop on Laser Safety Knowledge
- International Advanced Laser Technology Forum
- Laser Technology in Semiconductor Manufacturing
- PCB Intelligent Manufacturing Innovation Forum
- New Energy Automotive Laser Technology Frontier Forum

*Please contact us for detailed meeting schedule and sponsorship package

Why Exhibit

- 1 Focused coverage on 5G and new infrastructure construction, including the entire industrial chain of smart manufacturing and electronic innovation, to establish upstream and downstream cooperation, and provides high-value trade opportunities.
- 2 Diversified exhibition forms present product in a scenario-based environment, and provide efficient, innovative and flexible communication opportunities for the industry.
- 3 Integrated online and offline resources that offer three-dimensional marketing tools for corporate brand enhancement, and secure more business opportunities.
- 4 5G and new infrastructure construction connect huge investment and demand. With invited core target buyers, the organizer provides opportunities from consumer electronics, automotive electronics, industrial electronics, medical electronics, wiring harness processing, and new energy industries.
- 5 Share the resources of LASER World of PHOTONICS CHINA, more than 400 thousand professional data + multi platform, diversified promotion way, and exhibitors could enjoy customized business matching services.

**Future is here,
Smart Manufacturing
is infinite!**
